

Menta Academy Oak Park

May 2019

Transitioning into Summer

Menta Academy Oak Park's Transition Program is working on creating brochures about recreation and leisure resources in their communities. This month, students will utilize community based instruction to focus on exploring identified resources in the areas they live. Students are also working on planning for the end of the BBQ and the Menta Open House Pancake breakfast. Students will be responsible for practicing safe and sanitary cooking for the breakfast. They will also create a menu and budget for the end of the year BBQ.

Museum of Mexican Art in
their community

Academic Spotlight

Project Based Learning in Science

This month in Science classes, students are preparing for the Spring Open House. Each student is researching a particular scientific topic and choosing an experiment to demonstrate their knowledge of the topic. After researching, students will develop a hypothesis, test it, collect data, and write a report on their findings. Be sure to come our Open House on May 18th to witness their discoveries!

Mr. Shaun

Staff Spotlight

Mr. Shaun has worked at Menta Academy Oak Park for 1 year

Favorite Food:
Sushi

Favorite Hobbies:
Playing and coaching
Baseball

Favorite thing about
Menta:
Making sure all
students have a
chance to live up to
their potential.
